

## ENVIRONMENTAL POLICY

Equiset is a leading Australian owned Construction and Asset Management company.

The company is committed to a continual improvement in the reduction of any environmental impacts, including the prevention of pollution that its activities may cause.

Equiset is committed to complying with all environmental legislation relevant to the jurisdictions in which it operates. In addition, we aim to meet or exceed industry and community expectations.

We are working to achieve and maintain accreditation to the requirements of AS/NZS ISO 14001:2004 Environmental Management Systems.

Key areas of environmental focus include the design and construction of buildings which have a low impact on the environment; following industry best practice guidelines for the recycling of materials and minimisation of construction site waste.

Equiset has set environmental Objectives and Targets which are reviewed on a regular basis, to monitor improvement and also to ensure that they remain relevant to the organisation.
